

## P-690

P-690 is the ideal product for coating and sealing outdoors or when you are in need of a color-stable coating. With its excellent weathering characteristics and impact resistance, you can count on outstanding protection that will last and last.

## P-690 Benefits

P-690 is a two-component polyurea that has been specifically designed for floor coatings. The product can be used on multiple surfaces, including concrete, wood and metal. It performs well in extreme climates and has a high level of impact abrasion resistance, making it ideal for outdoor walkways. P-690 is very easy to use and can be rolled, brushed or sprayed over the surface you'd like protected. One gallon of product is sufficient for coating and sealing an area up to 260 square feet and has a six-month shelf life when properly stored.

## Polyurea Coatings

### P-690
